

Fall 2026 CMP_SC1050

Flipped Classroom Lecture Recording Plan

- **Chapter 0: How to SRL**
- **Chapter 1: Introduction to Computers and C programming**
 - Video 1 **(COMPLETE)**
 - Computers: Hardware and Software (Slides 1-6)
 - Student Outcomes
 - Assignment/Assessment
 - Video 2 **(COMPLETE)**
 - Data Hierarchy (Slides 7-13)
 - Video 3 **(COMPLETE)**
 - Machine Languages, Assembly Languages, and High-Level Languages (Slides 14-19)
 - Video 4 **(COMPLETE)**
 - History of C, and Typical C Program Development Environment (Slides 20-31)
- **Chapter 2: Introduction to C Programming (SLIDES UPDATED)**
 - Video 5 **(COMPLETE)**
 - A Simple C Program: Printing a Line of Text (Slides 1-19)
 - Video 6 **(COMPLETE)**
 - Another Simple C Program: Adding Two Integers (Slides 20-35)
 - Video 7 **(COMPLETE)**
 - Memory Concepts and Arithmetic in C (Slides 36-47)
 - Video 8 **(COMPLETE)**
 - Decision making (Equality and Relational Operators), Keywords, Secure C Programming (Slides 48 -62)
- **Chapter 3: Structured Program Development in C (SLIDES UPDATED)**
 - Video 9
 - Introduction, Algorithms, Pseudocode, Control structures (Slides 1-17) (Section 3.1, 3.2, 3.3, 3.4)
 - Video 10
 - If selection, if-else Selection Statement (Slides 18-31) (Sections 3.5, 3.6)
 - Video 11
 - While-statements, counter-controlled repetition (Slides 32- 42) (Sections 3.7, 3.8)

- Video 12
 - While-statements, sentinel-controlled repetition (Slides 43-61) (Section 3.9)
- Video 13
 - While-statements, nested control structures (Slides 62-75) (Section 3.10)
- Video 14
 - Assignment operators, increment and decrement operators (Slides 76-86) (Section 3.11, 3.12)
- **Chapter 4: C Program Control**
 - Video 14
 - Repetition, and recap of counter-controlled repetition (Slides 1-8)
 - Video 15
 - For-statement (Slides 9-18)
 - Video 16
 - for-statements (contd) and examples of for-statements (Slides 19-32)
 - Video 17
 - switch Multiple selection statements (Slides 33-55)
 - Note: Too many slides in between, but code examples are split into multiple slides. Can't think of splitting the video recording into multiple video recordings. The example will be split, which I don't think is a good idea.
 - Video 18
 - do-while statements (Slides 56-60)
 - Video 19
 - Break and continue statements (Slides 61-68)
 - Video 20
 - Logical operators (Slides 69-82)
 - Video 21
 - Equality vs assignment operators (Slides 83-93)
- **Chapter 5: Functions**
 - Video 22
 - Introduction to functions, program modules in C, and Math Library functions (Slides 1-9)
 - Video 23
 - C Functions and function definitions (Slides 10-28)
 - Video 24

- Function prototypes

- Chapter 6
- Chapter 7
- Chapter 8
- Chapter 9
- Chapter 10
- Chapter 11
- Chapter 14
